Subject: (13611) Exxon Pipeline Mayflower Oil Spill - Update
Date: Tuesday, April 30, 2013 10:50:38 AM

22 homes continue to be evacuated.

406 response personnel are currently responding to the incident.

EPA participated in a tour given to Senator Pryor. Senator Pryor requested that Unified Command provide an update to residents. A meeting is tentatively scheduled for Thursday at the Command Post.

The focus of the response continues to be on Bell Cove and the North Woods subdivision along N. Starlite Road.

Cleanup crews continue to remove brush from Bell Cove, work edge water areas, and change out boom and sorbent materials.

Exxon's storm drain removal project continues within the impacted neighborhood. Along with the storm drain removal, crews are removing and replacing the municipal drinking water service main that lies in the same ditch as the storm sewer.

EPA is coordinating with PMSA and the National Resources of Canada on a plan to provide an interpretation of the oil analysis for the EPA collected oil samples.
